

Bacteria, Protists, Fungi

Study Guide

You need to know the following terms and concepts:

Bacteria

- Characteristics of bacteria – single celled, prokaryotic
- Classification: producers and consumers; aerobes and anaerobes
- Structure
- Types: eubacteria and archaeobacteria
- Helpful and harmful bacteria; pathogens and toxins
- Use in food and industry, pasteurisation
- Nitrogen fixation

Protists

- Characteristics
- Three groups
- Importance

Fungi

- Characteristics
- Classification: club fungi, sac fungi, zygosporangium fungi, other fungi
- Lichens
- Helpful and harmful
